Subject Index

A

Aircraft, heuristics for scheduling, during airlift operations, 63–76
Airlift operations, heuristics for scheduling aircraft and crew during, 63–76
Airline optimal booking limits, 193–204
Airline seats, allocation of
  between stochastically dependent demands, 183–192
  optimal, with fare classes nested by origins and destinations, 193–204
Algorithm
  aircraft and crew scheduling, 63–76
  best optimal tour partition, 294–297
  commuters' paths with penalties, 276–286
  delay estimation for scheduled rail traffic, 261–275
  facility location schemes, 137–144
  fleet sizing, 169–182
  mean-variance location problems, 287–293
  multimodal network, 25–39
  PARTAN/Franke–Wolfe, for equilibrium assignment, 58–62
  Q iterated optimal tour partition, 294–297
  routing and point-to-point delivery, 245–260
  schedule for fixed vehicle path, 145–152
  scheduling of extraboard operators, 87–104
  successive linear approximation procedure (SLAP), 40–57
  traffic equilibrium, 105–116
Approximation procedure, successive linear, for stochastic, dynamic vehicle allocation problems, 40–57
Arrival time, early or late, commuters' paths with penalities for, 276–286

B

Bibliographic section, 79–86, 159–167, 217–229, 308–311

C

Carrier services, outside, for fleet size planning, 169–182
Commuters' paths with penalties for early or late arrival time, 276–286
Conical volume-delay functions, 153–158
Crew, aircraft, heuristics for scheduling, during airlift operations, 63–76

D

Delay estimation for scheduled rail traffic, 261–275
Delivery problems, heuristics for, with constant error guarantees, 304–307
Delivery route planning problem, 245–260
Dissertation prize competition, Transportation Science Section, abstracts, 298–307

E

Equilibrium
  assignment, full analytical implementation of PARTRAN/Frank–Wolfe algorithm for, 58–62
  queueing patterns, two-tandem bottleneck during morning peak, 217–229
  traffic, with discrete/continuous econometric models, 105–116
Equity maximizing facility location schemes, 137–144
Extraboard operators, transit systems, scheduling of, 87–104

F

Facility location schemes, equity maximizing, 137–144
Fare classes, airline, and seat allocation, 193–204
Fixed vehicle path, with convex inconvenience costs, optimizing schedule for, 145–152
Fleet size planning when outside carrier services are available, 169–182
Freight
  flows, multimode multiproduct network assignment model for strategic planning, 25–39
  transportation, rail, national, model for strategic planning of, 1–24

H

Heuristics for delivery problems with constant error guarantees, 294–297

L

Local search algorithms for vehicle routing and other combinatorial problems, 304–305
Location
  public facilities, under elastic demand, 117–136
  stochastic queue median, 230–243
Location problems
  conditional, on networks, 77–78
  mean-variance, 287–293

M

Mean-variance location problems, 287–293
Model
  aircraft and crew scheduling, 63–76
  airline seat allocation, 183–192, 193–204
  commuters' paths with penalties, 276–286
  discrete/continuous econometric, traffic equilibrium, 105–116
  extraboard operators, scheduling, 87–104
  freight flows, strategic planning, 25–39
  multimode multiproduct, 25–39
  multipurpose seaport terminals, 205–216
  point-to-point delivery problem, 245–260
  private fleet size, 169–182
  public facilities location, 117–136
  rail network, 1–24
  schedule for fixed vehicle path, 145–152
  strategic planning of national freight transportation by rail, 1–24
Morning peak, equilibrium queueing patterns at two-tandem bottleneck during, 217–229
Multimode multiproduct network assignment model for strategic planning of freight flows, 25–39
Multipurpose seaport terminals, productivity of, 205–216

N

Network
  conditional location problems on, 77–78
  facility location, 137–144
  multimode multiproduct, freight flows, 25–39
  public facilities location, 117–136
Network-based primal–dual solution methodology for multi-commodity network flow problem, 306–307

O

Optimization based heuristic for vehicle routing and scheduling with time window constraints, 302–304

P

PARTRAN/Franke–Wolfe algorithm, for equilibrium assignment, analytical implementation, 58–62
Passenger spill rate, airline, 183–192
Planar region, optimal stochastic queueue median, 230–243
Point-to-point delivery systems, routing in, formulations and solution heuristics, 245–260

Probabilistic combinatorial optimization problems, 298–302
Public facilities location under elastic demand, 117–136

Q

Queueing patterns, equilibrium, at two-tandem bottleneck during morning peak, 217–229

R

Rail
  lines, single-track, with scheduled traffic, two moments estimation of delay on, 261–275
  transportation, model for strategic planning of national freight, 1–24
Rolling horizon procedure, 40–57
Routing in point-to-point delivery systems, formulations and solution heuristics, 245–260

S

Seaport terminals, multipurpose, productivity of, 205–216
Scheduling, transit system, extraboard operators, 87–104
Single-track rail lines, with scheduled traffic, two moments estimation of delay on, 261–275
Stochastic dynamic vehicle allocation problems, 40–57
Stochastic queue median, trajectory analysis of in plane with rectilinear distances, 230–243

T

Time dependent vehicle routing problems, formulations, solution algorithms and computational experiments, 305–306
Traffic
  conical volume-delay functions, 153–158
  equilibrium, dynamic, with discrete/continuous econometric models, 105–116
Trajectory analysis of stochastic queue median in plane with rectilinear distances, 230–243
Transit systems, extraboard operators, scheduling, 87–104
Tree network, mean-variance on, 287–293

V

Vehicle allocation problems, successive linear approximation procedure for, stochastic, 40–57
Volume-delay functions, traffic, 153–158

U.S. Postal Service
STATEMENT OF OWNERSHIP, MANAGEMENT AND CIRCULATION
Required by 39 U.S.C. 3685

1A. Title of Publication	1B. PUBLICATION NO.	2. Date of Filing
TRANSPORTATION SCIENCE	0 9 7 6 8 0 0 0	10-1-90
3. Frequency of Issue	3A. No. of Issues Published Annually	3B. Annual Subscription Price
Quarterly	4	

4. Complete Mailing Address of Known Office of Publication (Street, City, County, State and ZIP+4 Code) (Not printers)
Mount Royal and Guilford Avenues, Baltimore, MD 21202 ,USA

5. Complete Mailing Address of the Headquarters of General Business Offices of the Publisher (Not printer)
Mount Royal and Guilford Avenues, Baltimore, MD 21202, USA

6. Full Names and Complete Mailing Address of Publisher, Editor, and Managing Editor (This item MUST NOT be blank)

Publisher (Name and Complete Mailing Address)
Operations Research Society of America, Mount Royal & Guilford Avenues, Baltimore, MD 21202, USA

Editor (Name and Complete Mailing Address)
Amedeo R. Odoni, Room 33-404, Center for Transportation Studies , MIT, Cambridge, MA 02139, USA

Managing Editor (Name and Complete Mailing Address)
None

7. Owner (If owned by a corporation, its name and address must be stated and also immediately thereunder the names and addresses of stockholders owning or holding 1 percent or more of total amount of stock. If not owned by a corporation, the names and addresses of the individual owners must be given. If owned by a partnership or other unincorporated firm, its name and address, as well as that of each individual must be given. If the publication is published by a nonprofit organization, its name and address must be stated.) (Item must be completed.)

Full Name	Complete Mailing Address
Operations Research Society of America	Mount Royal and Guilford Avenues Baltimore, MD 21202, USA

8. Known Bondholders, Mortgagees, and Other Security Holders Owning or Holding 1 Percent or More of Total Amount of Bonds, Mortgages or Other Securities (If there are none, so state)

Full Name	Complete Mailing Address
None	

9. For Completion by Nonprofit Organizations Authorized To Mail at Special Rates (DMM Section 423.12 only)
The purpose, function, and nonprofit status of this organization and the exempt status for Federal income tax purposes (Check one)

(1) [X] Has Not Changed During Preceding 12 Months (2) [ ] Has Changed During Preceding 12 Months (If changed, publisher must submit explanation of change with this statement)

10. Extent and Nature of Circulation (See instructions on reverse side)	Average No. Copies Each Issue During Preceding 12 Months	Actual No. Copies of Single Issue Published Nearest to Filing Date
A. Total No. Copies (Net Press Run)	2,075	2,117
B. Paid and/or Requested Circulation 1. Sales through dealers and carriers, street vendors and counter sales	75	79
2. Mail Subscription (Paid and/or requested)	1,280	1,416
C. Total Paid and/or Requested Circulation (Sum of 10B1 and 10B2)	1,355	1,495
D. Free Distribution by Mail, Carrier or Other Means Samples, Complimentary, and Other Free Copies	NONE	NONE
E. Total Distribution (Sum of C and D)	1,355	1,495
F. Copies Not Distributed 1. Office use, left over, unaccounted, spoiled after printing	720	622
2. Return from News Agents	NONE	NONE
G. TOTAL (Sum of E, F1 and 2—should equal net press run shown in A)	2,075	2,117

11. I certify that the statements made by me above are correct and complete

Signature and Title of Editor, Publisher, Business Manager, or Owner
Patricia Dittrich Executive Director
